Business Requirements Document (BRD)

Business Requirements Document (BRD) (can be accessed via [this link](#))

The objective of this project is to develop an **Advanced Sales and Revenue Analytics** Platform **specifically for the year 2020** to **enhance strategic planning and performance tracking**. This initiative aims to generate in-depth **customer behavior insights** to inform **targeted marketing and improve customer retention**.

The project scope includes collecting and integrating **sales, revenue, profit, and customer behavior** data from both **online and offline channels**, followed by a thorough analysis to identify **key performance indicators** such as **total order, revenue, profit, age distribution of buyers, repeat versus one-time orders, and the top spender in 2020**.

Additionally, an advanced analytics platform will be designed and developed to support these activities. The project will **involve multiple divisions**, including **IT, Sales, Marketing, Business Intelligence, Customer Service, and Inventory Management**. **Out-of-scope functionalities** include **data collection and analysis for years other than 2020**, development of unrelated software tools, unrelated market research, and non-relevant operational changes. This focused approach ensures that all efforts are concentrated on leveraging 2020 data for strategic insights and enhanced business performance.

Business Requirements Document (BRD)

Project Objectives:

1. Develop Advanced Sales and Revenue Analytics Platform for 2020 to Enhance Strategic Planning and Performance Tracking
2. Generate In-Depth Customer Behavior Insights to Inform Targeted Marketing and Improve Customer Retention

Business Requirements Document (BRD)

Needs / Problem Statements (1/2):

1. What were the total sales, revenue, and profit achieved in 2020?
2. How do the volume and value of purchase transactions compare between online and offline channels in 2020?
3. Which country contributed the highest sales, revenue, and profit?
4. Which products were the most and least sold in 2020?

Business Requirements Document (BRD)

Needs / Problem Statements (2/2):

5. What is the age distribution of buyers for each purchasing channel in 2020?
6. How does the number of customers making repeat orders compare to those making one-time orders in 2020?
7. In which months did the highest sales occur?
8. Who is the top spender in 2020?

Business Requirements Document (BRD)

Project Scope:

Data Collection and Integration

Phase 1: Collect sales, revenue, profit, and customer behavior data from both online and offline channels.

Phase 2: Integrate data from various sources into a unified data warehouse.

Divisions Involved: IT, Sales, Marketing, Business Intelligence

Data Analysis and Reporting

Phase 1: Analyze total sales, revenue, and profit for 2020.

Phase 2: Compare purchase transactions between online and offline channels.

Phase 3: Identify the country with the highest sales, revenue, and profit.

Divisions Involved: Business Intelligence, Sales, Marketing, Finance

Business Requirements Document (BRD)

Project Scope:

Customer Insights and Segmentation

Phase 1: Analyze customer age distribution for each purchasing channel.

Phase 2: Compare repeat orders versus one-time orders.

Phase 3: Identify months with the highest sales.

Phase 4: Determine the top spender among the customers.

Divisions Involved: Business Intelligence, Marketing, Customer Service

Operational Performance

Phase 1: Identify the most and least sold products.

Divisions Involved: Business Intelligence, Customer Service, Inventory Management

Business Requirements Document (BRD)

Project Scope:

Advanced Analytics Platform Development

Phase 1: Design and develop the analytics platform.

Phase 2: Implement advanced analytics features for strategic planning and performance tracking.

Divisions Involved: IT, Business Intelligence, Sales, Marketing

Technical Requirements Document (TRD)

Technical Requirements Document (TRD) (can be accessed via [this link](#))

Project Overview:

Data yang ada dalam csv akan dibuatkan ETLnya untuk disimpan dalam data warehouse yang terdiri dari data base layer, dim fact layer, dan data mart mart yang terpisah dari database production agar tidak mengganggu performa. Sebelum disimpan, data dari file csv tersebut akan dilakukan profiling dan cleaning bersamaan dengan proses ETL. Setelah disimpan di Data Mart selanjutnya akan dibuatkan tabel yang dibutuhkan untuk digunakan visualisasi dashboard menggunakan Looker Studio.

Technical Requirements Document (TRD)

Technical Design Diagram:

Technical Requirements Document (TRD)

Components:

- *Connection & Location Data Source*
 - *Data source adalah csv yang terdapat di Google Drive Global Electronics Retailer*
 - *Data dihubungkan ke Server & Storage di BigQuery menggunakan Pandas dan SQL*
- *Server & Storage*
 - *Storage yang digunakan untuk proses ETL dan penyimpanan ke database data warehouse adalah Google Cloud Platform melalui BigQuery*
- *Logical Data Flow*
 - *Untuk flow dapat dilihat pada diagram diatas*

Technical Requirements Document (TRD)

Application Requirements:

- Operating system
 - Tidak ada karena tidak menggunakan on premise (Menggunakan Google Cloud Platform)
- Application memory
 - Tidak ada karena tidak menggunakan on premise (Menggunakan Google Cloud Platform)
- Application CPU
 - Tidak ada karena tidak menggunakan on premise (Menggunakan Google Cloud Platform)
- Expected application transaction volume
 - 50 MB per Hari, 18 GB per Tahun

1 - 100 / 3868

***You can sort this table by total order or price as needed

1. Profit dan revenue berbanding lurus dengan jumlah ordernya
2. Terdapat penurunan penjualan, revenue, dan profit di bulan Maret hingga seterusnya, dikarenakan mulainya kondisi Pandemi COVID-19
3. Penjualan offline lebih diminati dibandingkan online dengan persentase 76,9% total order, 77,5% total revenue, dan 77,3% total profit
4. Produk yang paling perform pada tahun 2020 yaitu Adventures work desktop PC2.30 MD230 Silver dengan total order 36 dan kuantiti terjual sebanyak 120 buah
5. Negara dengan performa tertinggi adalah US dengan total order 2065
6. Top spender 2020 adalah William Templin dengan total order 4 dan total transaksi sejumlah \$14.687
7. Customers di kedua channel didominasi oleh Millennials dan Gen X, yaitu lebih dari 20%
8. Customers yang melakukan one-time order lebih banyak dibandingkan repeat-order (82,8%)

Action from Insights

1. Membuat promosi untuk penjualan di platform online untuk meningkatkan minat customer melakukan transaksi secara online, menyesuaikan dengan kondisi Pandemi COVID-19 yang mempersulit transaksi offline
2. Mengaplikasikan omnichannel sales & marketing untuk meningkatkan penjualan di seluruh channel.
3. Melakukan marketing sesuai dengan gaya mayoritas distribusi umur customers, yaitu Millennials dan Gen X.
4. Melakukan bundling produk dengan performa rendah bersama produk dengan performa baik, yang memiliki keterkaitan secara fungsi atau kategori.
5. Memberikan discount pada produk performa rendah.
6. Membuat dan menawarkan program membership kepada customer, bagi customer yang mendaftar program ini akan diberikan keuntungan-keuntungan tertentu seperti loyalty program, special discount.
